Dear Ukrainian Partner,

due to the despicable continued Russian aggressions against your country we will continue to support you as best as we can! As a university specialised in resources and technology we are building a programme of digital courses and teaching materials as well as live lectures and Q&A sessions to enrich the study programmes of Ukrainian Higher Education Institutions.

With funding support of the “Stiftung Innovation in der Hochschullehre” TU Bergakademie Freiberg and partners are expanding the scope of our project “SUUUpoRT - Structural support of Ukrainian Universities in Up-keep and rebuilding of higher education activities in the field of Resources and Technology”.

Students are already actively using the resources and engaging with the programme and we want to give you some updates on what we are working on:

- **Cooperation**

- [We offer paid teaching contracts for Ukrainian teachers](#) translating and integrating the resources on the platform of the SUUUpoRT project [in 2022](#).
- [We are developing teacher tandems to lay the foundations for future cooperation and project work.](#)

If you are interested in the cooperation in the framework of the SUUUpoRT project, please fill in the form and provide more information: <https://forms.gle/9wN2PYSiiXruftS17>

- **Courses**

- More courses have been added and others are being recorded at the moment.
- Live sessions from the current semester are available now.
- We are working on the acquisition of certificates as well as ECTS points.
- We are optimizing the platform registration and navigation.

The registration will be kept open throughout the semester to access the current pool of teaching materials and videos. Although [we encourage to sign up before 31st October 2022 to make full use of live lectures](#) as well. We kindly ask you to multiply this invitation with your students, teachers and partners. Since we are in a continuous development of the portfolio of the SUUUpoRT programme we are also actively encouraging students and teachers to provide us feedback on what content is needed and what areas need improvement.

Please visit for more information <https://tu-freiberg.de/virtuelle-fakultaet/suuuport-project/information>

For any questions, feedback or coordination please do not hesitate to contact us via support-ukraine@tu-freiberg.de. Thank you and stay strong!

Prof. Dr.-Ing. Urs Peuker

Prorektor für Strukturentwicklung (Vice-Rector for Structural Development)
